

AMP FITOUT - QUAY QUARTER TOWER

Sydney NSW

Project Exclusive

Quay Quarter Tower is home to AMP Sydney. AMP is a financial services company in Australia and New Zealand. They provide superannuation and investment products, financial advice, and banking products.

Post QQT redevelopment in 2022, AMP now occupies levels 17-35. Their office spaces capture breath-taking views across the city. It's open and bright design showcases contemporary work settings that meet every functional need. The new space support's neurodiversity, collaboration, life-long learning, and well-being.

The magnificent spiral staircase by 3XN is at the centre of the build. It connects workplaces on all 19 floors and a series of Hassell-designed bridges intersect across the void, promoting uncommon transparency throughout all levels.

The Access Floor Scoop

A focus of AMP's development was the use of natural materials to **support a biophilic interior environment**. 12 different species of FSC certified timber were installed throughout the building, which included ASP's Concept + Timber series. A FSC certified prefinished Accessing Flooring system.

The Concept + Timber range is also an environmentally friendly option as it's not only more energy efficient than other surfaces, but also uses less energy during production.

ASP Access Floors installed over 9,900m² of the Concept + Timber series. ASP Concept + Timber series provides the luxury of natural timber floors whilst allowing the functionality of an access floor with **100% underfloor accessibility**.
